About

Frontend developer with skills in JavaScript, React, HTML, CSS, Git, Figma, GitHub and unitTesting. My career as a psychologist allows me to approach frontend development from a unique perspective. Passionate about creating meaningful digital experiences by applying agile methodologies such as Scrum. I am looking for opportunities to grow professionally and contribute to the technology sector with empathy and excellence.

Hard Skills: React | TypeScript | JavaScript | HTML | CSS | Git | Git Hub | Notion | Scrum | Slack | Testing

Life skills: Time management | Effective communication | Leadership | Teamwork

Languages: English B1

Projects

Movie Challenge | May 2024 - June 2024

I developed Movie challenge, a platform that uses The Movie Database API V3 to view, filter and sort movies. It allows you to browse an extensive catalog, search by genre, year and rating, and sort by popularity and release date.

Technologies Used: React.js, TypeScript, HTML, CSS, Git, GitHub, Figma, Notion

Dataverse Chat | March 2024 - April 2024

I developed Dataverse chat, an SPA that allows users to explore data about singers with filtering and statistics functions. I integrated the Open AI API for personalized interactions through an integrated chat.

Technologies Used: JavaScript, HTML, CSS, Git, GitHub, Figma, Notion

Previous experience

Aprendiz Universitario | Cenipalma | April 2021 - May 2022

I validated documents accurately, strengthening my attention to detail and my ability to communicate effectively. In addition, I collaborated effectively in regulatory compliance, further developing my teamwork and effective communication skills in demanding work environments.

Education | Courses
